PATENT

PENDING CLAIMS AS AMENDED

Please amend the claims as follows:

1-8. (Canceled)

9. (Previously Presented) A method for a communication system comprising:

transmitting a request message, for acquiring a data packet channel, from a mobile station

to a base station:

transmitting an assignment message, for said acquiring said data packet channel, from

said base station to said mobile station;

transmitting a notification message from said base station to a base station controller,

wherein said notification message informs said base station controller of a process of said

acquiring said data packet channel;

completing said acquiring said data packet channel;

transmitting an indication message from said mobile station to said base station controller

indicating a successful completing of said acquiring said data packet channel;

starting a timer at said base station controller for measuring time expired after receiving

said notification message;

transmitting a radio link release message from said base station controller to said base

station in response to detecting expiration of said timer with respect to a timer threshold before

receiving said indication message.

10 - 18. (Canceled)
